end

Site involves a group of "Vobgh" individuals demonstrating a military & political feel, & are preparing to perform some sort of action. Involved in the action is the concept of ex-~~+~~ infiltration (see page 20).

They are located in a "cantonment" area which has been converted from something for this purpose. Their intentions involve "critical nodes" (see St.V on p. 16, 17) & requires planning & much outside information & details for success.

Many apparent crates, cylinders & boxes ~~litter~~ are stacked in the area, & seem to contain supplies & munitions, including lots of explosives & food & comm gear & etc. ~~Event~~ Event appears to be "scheduled" for sometime toward the end of the next week & a half.
